

KAVYA JAYARAMAN

Cloud & Backend Engineer | AWS | ASP.NET Core | DevOps & Automation

Ooty, Tamil Nadu, India | kavyajayaraman07@gmail.com | +91 8903327740 | linkedin.com/in/kavyajayaraman

PROFESSIONAL SUMMARY

AWS Cloud and Backend Engineer with 2+ years building scalable, cloud-native systems on AWS (EC2, S3, RDS, Lambda, ECS/EKS) using C# and ASP.NET Core. Skilled in RESTful APIs, microservices, CI/CD (GitHub Actions), Docker/Kubernetes, and Infrastructure as Code (CloudFormation). Delivered 30% faster billing processing, 25% faster data retrieval, and 40% less manual effort while sustaining 99.9% uptime. AWS Cloud Architect certified.

TECHNICAL SKILLS

Cloud (AWS): EC2, S3, RDS, Lambda, VPC, Auto Scaling, ELB, IAM, CloudFormation, CloudWatch, Route 53, SQS/SNS, API Gateway, GuardDuty, ECS, EKS, Disaster Recovery, High Availability

DevOps & Backend: Docker, Kubernetes, CI/CD (GitHub Actions), Git, Linux, OOPS, C#, ASP.NET Core, Web API, Microservices, Entity Framework, JWT, RBAC, Multi-Tenant Architecture, IIS

Security, Data & Automation: IAM Policies, Security Groups, VPC/Subnet Design, MySQL, Query Optimization, OCR, AI-Based Extraction, Regex Engineering, ETL Pipelines

Tools & Practices: Visual Studio, Postman, GitHub, MySQL Workbench, Agile/Scrum, SDLC, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software Engineer | Prozioid Analytics Private Limited

Mar 2024 – Present

Bengaluru, Karnataka, India

- Architected an AI-powered document processing platform (C#, ASP.NET Core, OCR + AI extraction), cutting billing processing time by 30%.
- Designed scalable RESTful APIs and microservices with Entity Framework ORM on IIS, improving throughput and reducing cross-service latency.
- Tuned MySQL schemas, indexes, and queries, increasing data retrieval speed by 25% under production load.
- Deployed and operated workloads on AWS EC2/EKS with secure configs, S3 storage, and least-privilege IAM, sustaining 99.9% uptime and 100% compliance.
- Built CI/CD pipelines in GitHub Actions and enforced RBAC and multi-tenant data isolation across all platform modules for enterprise clients.
- Automated data ingestion, validation, and processing workflows end-to-end, cutting manual operational effort by 40%.
- Instrumented infrastructure with CloudWatch and GuardDuty for proactive monitoring/threat detection, improving system efficiency by 15%.

KEY PROJECTS

Utility Bill Management System — Automated Billing Pipeline

- Built an automated pipeline processing 10,000+ bills/month (OCR, Regex parsing, validation, payment generation) with multi-tenant ASP.NET Core APIs, reducing cycle time by 35% for 5+ enterprise clients.
- Launched real-time analytics dashboards for billing visualization, reducing billing errors by 20% over six months.

Invoice Processing System — AI/OCR Automation Platform

- Built an event-driven invoice automation platform (AI extraction, OCR, Regex) processing 500+ multilingual documents/day at 95%+ accuracy, cutting processing time by 60%.
- Built automated email-ingestion and RBAC-based approval workflows on ASP.NET Core microservices, eliminating manual work for 80% of invoice tasks and lifting cross-team productivity 30%.

CERTIFICATIONS & TRAINING

- AWS Cloud Architect Certification — Codicature (2024): highly available, fault-tolerant AWS design — VPC, disaster recovery, serverless, CloudFormation (IaC), security best practices.

EDUCATION

B.E., Aeronautical Engineering — Bannari Amman Institute of Technology

Sathyamangalam, Tamil Nadu, India | 2019 – 2023 | CGPA: 8.88 / 10
